BOPP BAG

Perfect for BOPP

Our PP woven fabric is the ideal substrate for BOPP lamination, offering a robust and versatile base material for various packaging applications. The fabric's dimensional stability and tear resistance ensure that your BOPP-laminated products maintain their integrity throughout their lifecycle. With exceptional printability, our fabric allows for vibrant and eye-catching designs, enhancing your brand visibility and product appeal.

PP JUMBO BAG

Perfect Weaved

Gujarat Packaging PP woven fabric is engineered for optimal performance in woven applications. The fabric's high tensile strength and puncture resistance make it suitable for heavy-duty sacks and bags. Its consistent quality and uniform weave ensure smooth and efficient processing on your production lines. Choose our woven fabric for reliable and durable packaging solutions that protect your valuable goods.

BOPP TAPE (CELLO TAPE)

BOPP tape, also known as adhesive tape or packing tape, has a wide range of uses. It is commonly used for sealing boxes and packages for shipping or storage. BOPP tape is known for its strong adhesive properties and durability, making it ideal for securing items during transportation. It can also be used for various crafting projects, such as gift wrapping or DIY projects. BOPP tape is a versatile tool that helps ensure the safety and security of your packages and belongings.

STRETCH ROLL

PE stretch film, also known as plastic wrap, has a variety of uses. It is commonly used for wrapping and securing pallets and packages for shipping and storage purposes. PE stretch film provides protection against dust, moisture, and tampering, ensuring the safety of the items being wrapped. It is also used for bundling and securing items together, such as grouping boxes or securing loose items. PE stretch film is a versatile packaging material that helps keep items secure and protected during transportation.

BUBBLE ROLL /SHEET

Air bubble rolls are commonly used for providing cushioning and protection during shipping and storage. They consist of a sheet of plastic with air-filled bubbles that create a protective layer around fragile items. Air bubble rolls are often used for wrapping delicate items like glassware, electronics, or ceramics to prevent damage from impacts or vibrations. They are also useful for filling empty spaces in boxes to prevent items from shifting during transit.

NONWOVEN BAG

Non-woven bags have a wide range of uses! They are eco-friendly alternatives to plastic bags and are commonly used for shopping, carrying groceries, or running errands. Non-woven bags are durable, reusable, and can hold a significant amount of weight. They are also great for promotional purposes, as they can be customized with logos or designs. Additionally, non-woven bags can be used for organizing items at home, storing clothes, or even as gift bags. Their versatility and sustainability make them a popular choice for many people.

BLISTER PACKAGING

Blister packaging products are commonly used for retail packaging of small items. They provide a transparent and protective cover, allowing customers to see the product while keeping it secure. Blister packaging is often used for items like electronics, toys, cosmetics, and small hardware items. It helps prevent damage, tampering, and theft, while also providing a visually appealing display. Blister packaging is a popular choice for product packaging in various industries.
